Summary

Main skill - problem-solving. I do prototypes and MVPs for startups in the idea/pre-seed stage and help them to build scalable infrastructure and innovative corporate culture. If you have an idea and looking for someone technical to build it, reach out. Especially interested in SaaS and EdTech.

Book meeting with me. <https://calendly.com/yev-rachkovan/30min>

Technical Product Manager

NicheStack

Mar 2021 - Jun 2021 (4 months)

Competitors analysis and making a product roadmap for an e-commerce project

Technical Product Manager

Software Planet Group

Jan 2021 - Mar 2021 (3 months)

Full Stack Engineer

Software Planet Group

May 2019 - Jan 2021 (1 year 9 months)

I've been mostly working on a growing SaaS startup in a data visualization domain.

My common tasks were:

- Migration and cost optimization of cloud architecture on AWS.
- Building a configuration framework for large multi-tenant Kubernetes system with Terraform
- Engineering tasks for data pipelines with Python and Django
- Analysing time-series data with the purpose of finding bottlenecks and issues in architecture
- Database management and data optimization for high load
- Configuring architecture monitoring
- Perform Proof of concepts

Internship Program

InterLink LLC, Ukraine

Mar 2019 - May 2019 (3 months)

Winter Practice

InterLink LLC, Ukraine

Jan 2019 - Feb 2019 (2 months)

I've been leading a team of young pathfinders to create this masterpiece with React and Redux
